(54) Title: **PALLET RACK IMPACT PROTECTOR**

(57) Abstract: A pallet rack upright column protection device for the use in preventing and reducing destructive levels of kinetic energy of motion from occurring to a pallet rack upright. The device is made from an assembly of multilateral polymer based elastomeric materials that has a primary external component, and with a synergistic less dense internal component. The device attaches directly to the front and lateral sides of the lower section of a rack upright.
